Drossinakis' methodic – new challenge for scientists

Dr. Ignat Ignatov, physicist
Sofia, Bulgaria
http://www.medicalbiophysics.dir.bg/de/ignat_ignatov.html

For 40 years Dipl. Eng. Christos Drossinakis has conducted bioinfluence with medical effect. The obtained results bear such significance that centers and institutes in Europe are interested in the research of his biophysical fields. These results assist many new scientists in their new analyses. The studies were conducted in Germany, Switzerland, Russia etc.
In Bulgaria there is an essential interest toward the activity of Dipl. Eng. Christos Drossinakis. The greatest number of scientific projects is realized in the Scientific Research Center of Medical Biophysics by Dr. Ignat Ignatov. The experimental program includes black-and-white Kirlian photography, color Kirlian spectral analysis according to a methodic of Dr. Ignatov, spectral analysis of water with the device of Prof. Anton Antonov DPhSc. The scientific consultant of the research is the director of the Physics Institute, Technical University, Prof. Marin Marinov DPhSc. Prof. Anton Antonov DPhSc carries out interesting experiments in the Neofit Rilski South-West University.
In 2007 Dipl. Eng. Christos Drossinakis established the International Academy for Spiritual Healing (IAWG). Over 200 students have been trained so far in the author methodic of Drossinakis regarding bioinfluence with a medical effect. All students are tested in the following scientific institutes and centers.
The statistical and scientific analysis show that there are biophysical indicators for Drossinakis' methodic for education.
1. Von den gemachten über 2000 Kirlianauren haben nur 5 Testpersonen, die nach Drossinakis'© ausgebildet wurden, eine einzigartige 100% Entladung an der Kontaktstelle von Daumen und Fotoemulsion erzielt (Drossinakis, Strauss, Hirschle, Seidler, Eder). This is indicator for influence on tumor diseases.

Kirlian images of Christos Drossinakis, Harald Seidler, Stefan Hirschle, Hans Strauss, Lieselotte Eder

Kirlian aura of a man without manifested bio abilities.

2. The best results in “give” and “take” mode of energy bioinfluence. Research© is conducted by the authors’ team of Dr. Ignat Ignatov, Prof. Anton Antonov, DPhSc, Dipl. Eng. Tatyana Galabova (1998) with water spectrum analisys. The author of the method “DNES” (Differenz von Energiespektren des Wassers im Ungleichgewicht) is Prof. Antonov. When the ailing organ or system lack energy, then energy is “given”. In case of accumulation of morbid energy it is “taken” from the human body. There are the indicators for bioresonance between the “yang” and “yin” energies in the Chinese meridians (Dr. Ignatov, 2005).

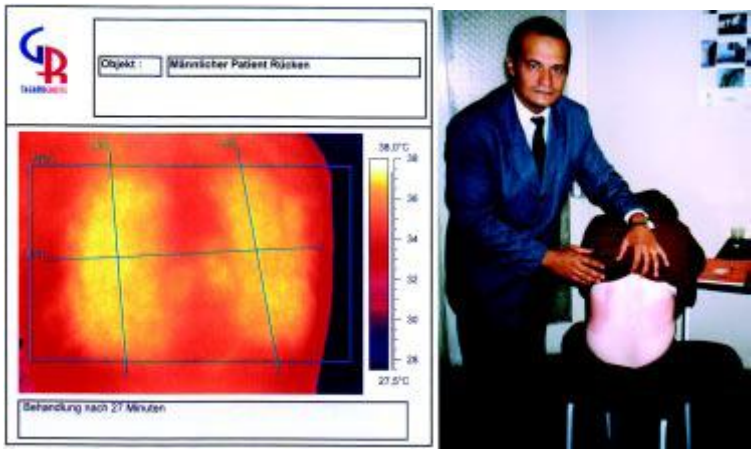
SPECTRAL ANALYSIS OF BIOINFLUENCED DEIONIZED WATER

Name	Give Mode:	Take Mode:	Effective Energy: *
Dipl. Eng. Christos Drossinakis* (Germany.Gr.)	-7.0	7.2	-14.2
Harald Seidler (Germany)*	-7.0	6.7	-13.7
Helmut Gebert (Germany)*	-6.7	6.5	-13.2
Bettina Zastrow (Germany)*	-6.0	6.5	-12.5
Richard Weitz (Germany)*	-6.1	6.2	-12.3
Dipl. Eng. Winfried Preiss (Switzerland)*	-6.0	6.2	-12.2
Aleksi Simeonov (Bulgaria)	-6.6	5.6	-12.2
Michele Godest (Germany)*	-5.6	6.6	-12.2
Anne-Marie Risbjerg (Denmark)	-6.1	6.0	-12.1
Bruno Umiker (Switzerland)	-6.0	6.1	-12.1
Martin Müller (Germany)*	-6.1	6.0	-12.1
Dipl. Eng. Thomas Ebler (Germany)*	-6.2	5.9	-12.1
Aisalkyn Sasanbaeva (Kyrgyzstan)	-5.4	6.7	-12.1
Mandy Protze-Kalberer (Germany)	-6.0	6.0	-12.0
Christiane Schröder (Germany)*	-6.0	6.0	-12.0
Sonam Temba Lama (Tibet)	-5,8	6,2	-12,0
Tanya Metodieva (Bulgaria)	-8.7	3.3	-12.0
Lieselotte Eder (Switzerland)*	-5.5	6.4	-11.9
Angela Zellner (Germany)	-4.5	7.4	-11.9
Anita Gebert (Germany)*	-5.7	6.1	-11.8

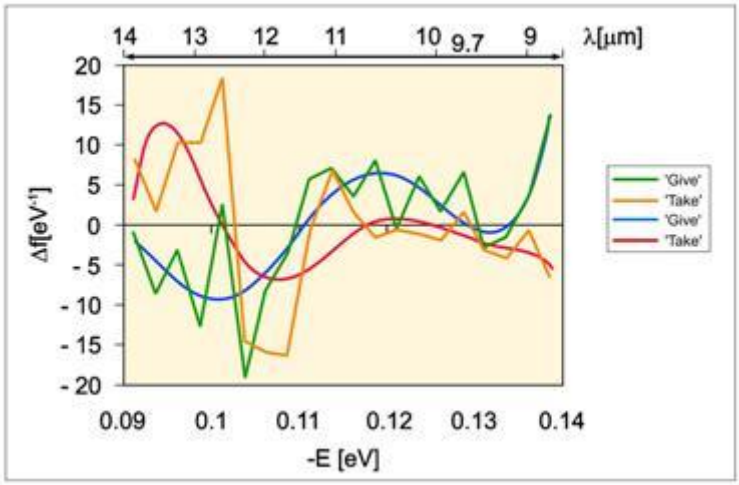
*People, who were educated with Drossinakis' methodic.

3. Preservation of information among the water molecules 4 months for "give" mode and 3 months in take mode. The project "Informationability" of water" has connected with expected medical results in human body.
http://www.medicalbiophysics.dir.bg/de/water_memory.html
4. Bioresonance interaction between Drossinakis biophysical fields and human body. The measurement is also with thermo vision in Germany. This is indicator for influence on tumor diseases.



Drossinakis-Ignatov Effekt, thermographie

4. All statistical analyses show big spectrum of waves after education with Drossinakis' methodic. That means possibilities for influence on energy and like result diseases in human body.



Dr. Ignatov zeigt, das 9,7 µm
die größte Bioresonanz
Spitze der Bioresonanz-Interaktion unter
Wassermolekülen und biophysikalischen Feldern ist.
Diagramm: Dipl. Ing. Yatsevich

Wasser nach der Beeinflussung von Drossinakis mit den biophysikalischen Feldern. Gleichzeitig wurden von beiden Proben Kirlian-Auraaufnahmen gemacht. In der Spektralanalyse des gleichen Wassers wurden folgende Höchstwerte beobachtet – bei -0.1112, -0.1187, -0.1262 und -0.1387 eV. Das Diagramm zeigt ein statistisch glaubwürdiges Resultat über den Bioeinfluss einer Gruppe von 30 Leuten. Analysen zeigen eine Bioresonanz-Interaktion zwischen biophysikalischen Feldern und Wassermolekülen. Höchstwerte sind mit der Formation von relativ stabilen Clusterformationen verbunden. Das Resultat ist wichtig, da es die Möglichkeit zeigt, biophysikalische Felder auf einen Bioresonanz-Prinzip zu nutzen, um biologische Strukturen zu speichern (Dr. Ignatov, 2005). Dubrov, der Urheber der Bioresonanztheorie, zeigt die Gegebenheit von Bioresonanz-Interaktion in lebenden Organismen.
