

Prof. Dr. h. c. Christos Drossinakis

Human is physics

Prof. Dr. h. c. Christos Drossinakis

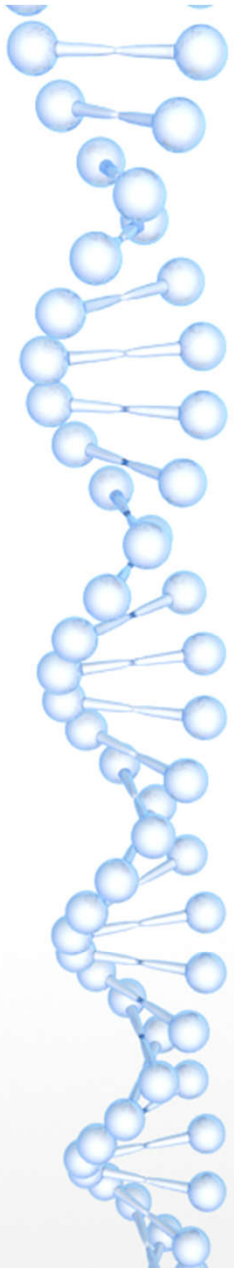

The spirit rules over energy and matter

Human is physics

Function of biological systems:

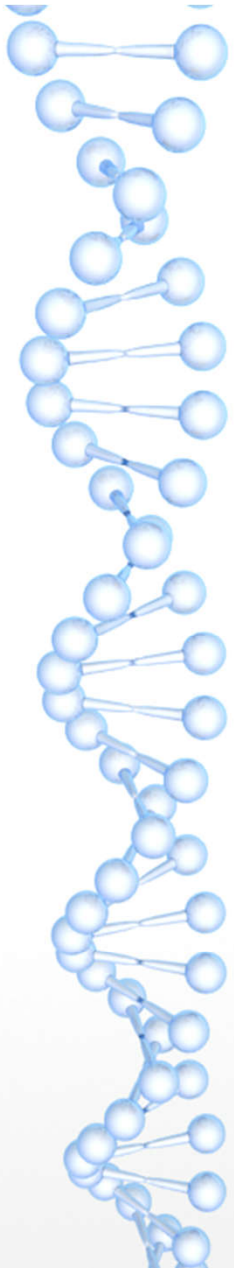

- 2/3 electromagnetic energy
- 1/3 biochemical energy
- Life = radiation

Experimental healing

Electromagnetic field 3 processes:

- Human is transmitter + receiver
- Transmission of information by electromagnetic waves
- Central switching point DNA

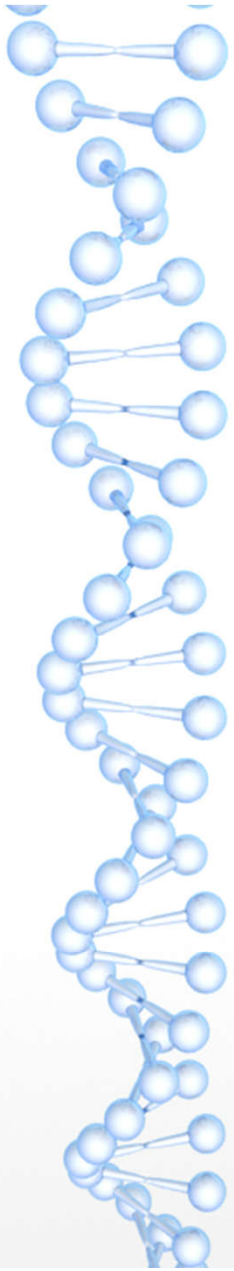

Experimental healing

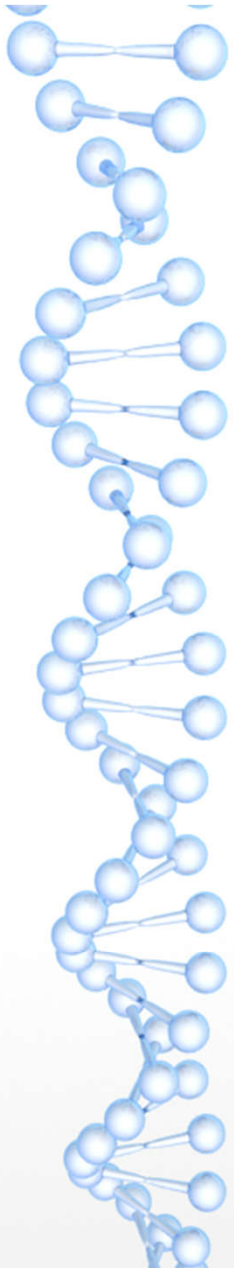

Life = information

Human = energy

- Water = information carrier
- Water changed + activated
- the functional structures of the system

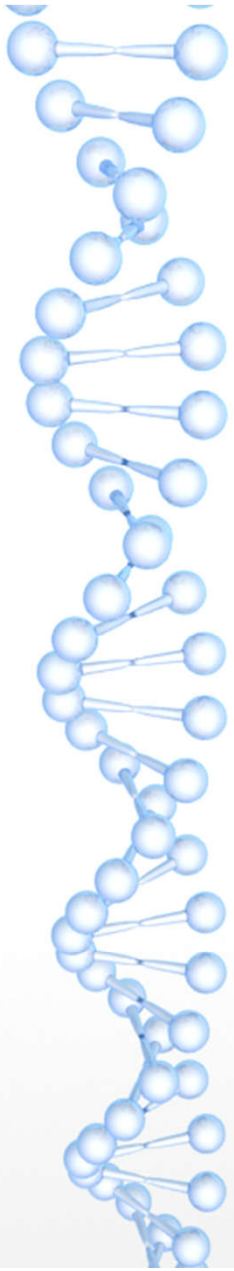

- Emergence diseases
- Energetic state not given
- imbalance

Experimental healing

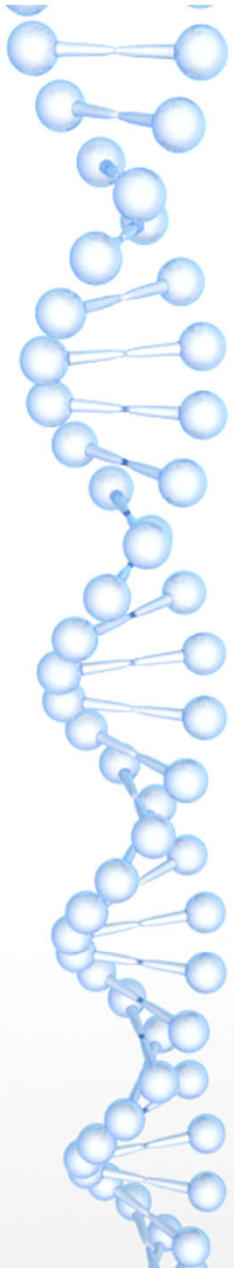

Human = physics

- gravitation
- quantum physics
- thermodynamics

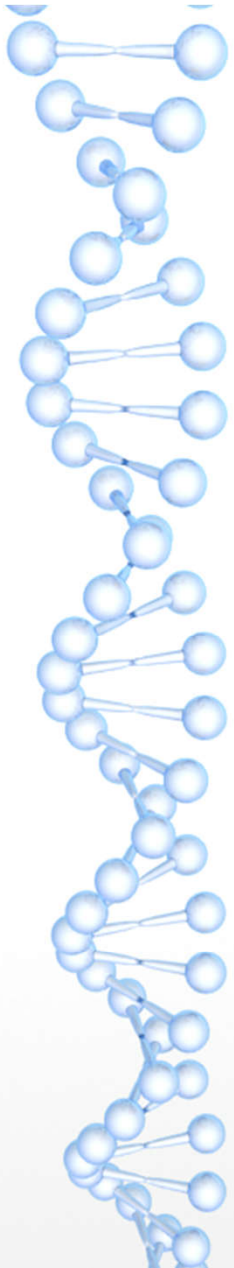

Theory of temperature

- energy deficiency
- energy intolerance
- 35.1 - 36.6 degrees Celsius
 - Tiredness = rest
 - Cold = energy loss

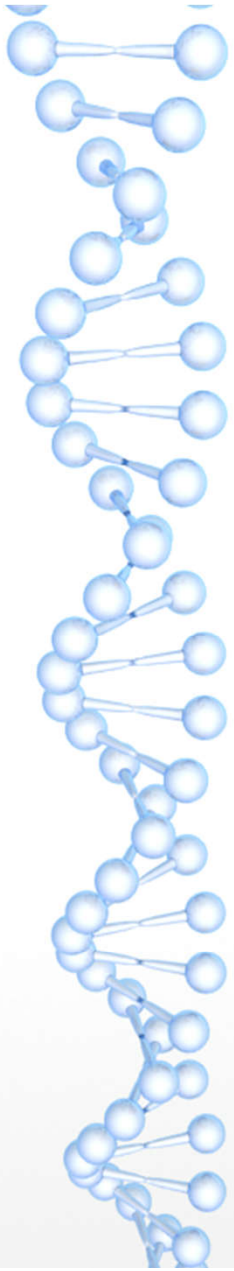

Theory of cancer

- Biopsychology of the cancer cell
- physiological + psychological behavior patterns
- electromagnetic mechanisms of action

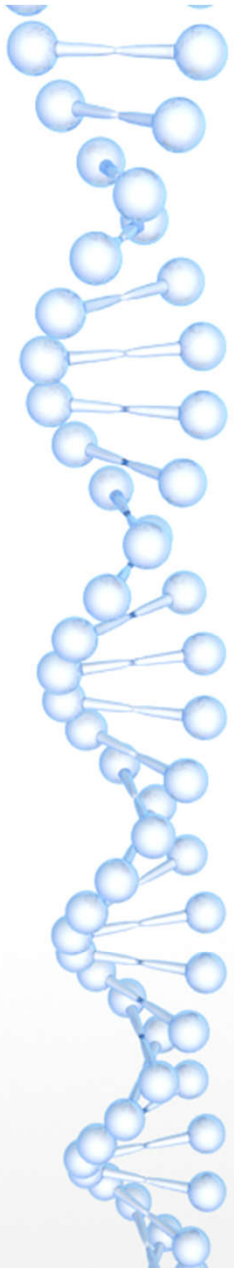

Theory of cancer

- Existence of the cancer cell
- Programs control functions,
 - Course, maturation,...

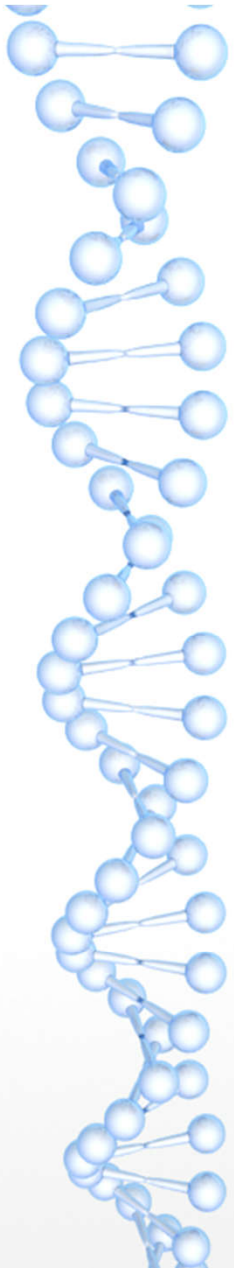

Theory of cancer

- Tumor = cancer cell population
- Behavior act on
 - Relationship,
- Instinct acts + Characteristics of the cancer cell

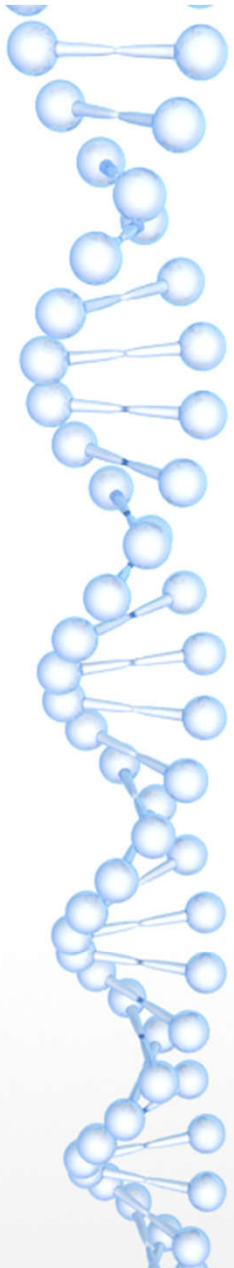

Theory of cancer

- Cancer cell 9-16 times more energy
 - fermentation
 - Energy from environment
- System lacks energy for optimal function

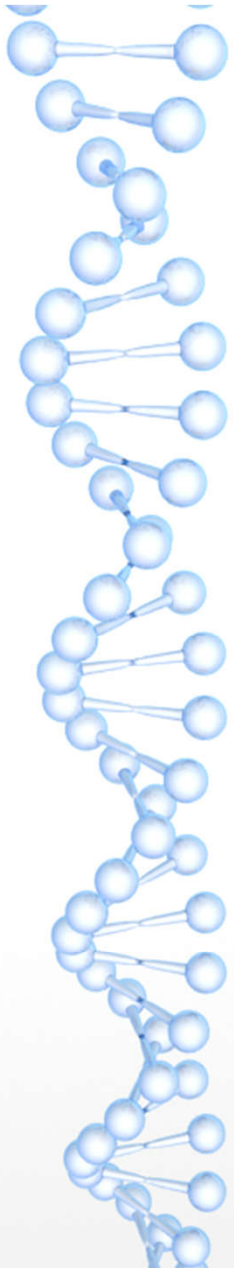

Theory of cancer

- stress
- Change of function
- mutation
- Tumor = cancer cell

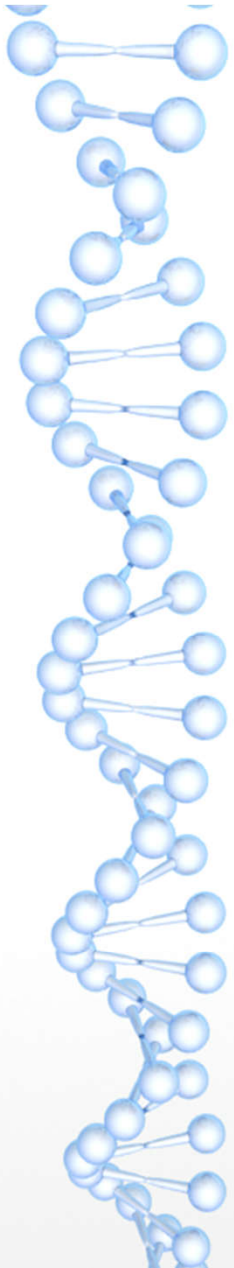

Theory of cancer

- Brownian movement
- in extracellular substances
- Water of the tumor

Movement of the molecules

- mechanical energy on membrane of the cell
- electromagnetic + thermodynamic energy

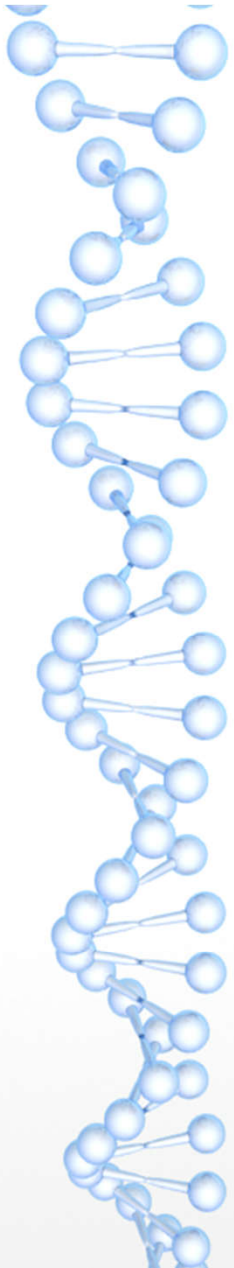

Movement of the molecules

- greater entropy = more energy
 - intelligence growth
 - Use for mutation
- Metastasis = cell migration

tumor

- Coupling to the brain
- Annihilation wrong
- Researching the programs

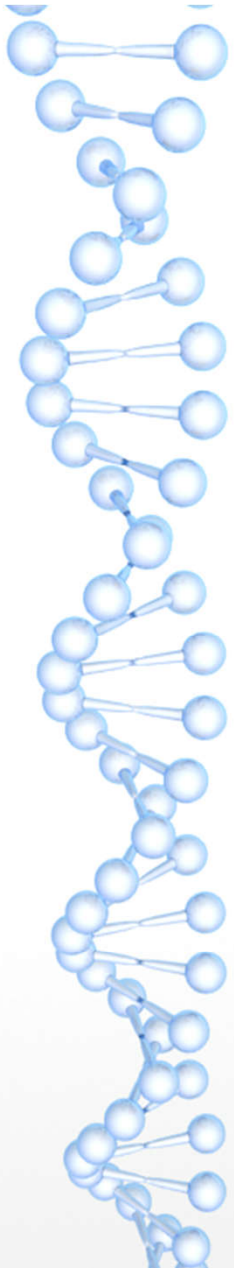

• Biological systems

• =

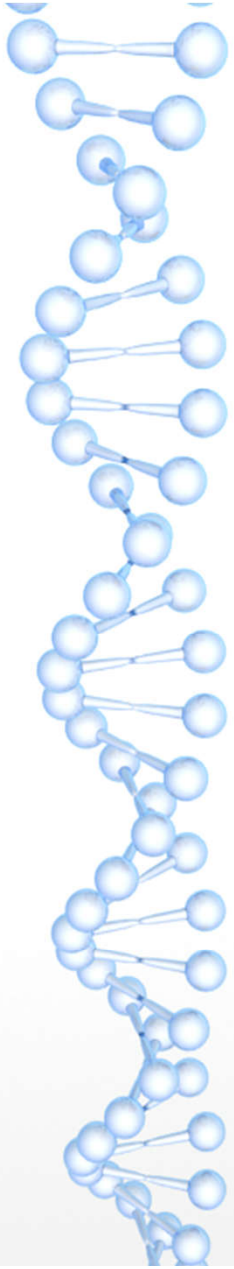

• knotted waves

• Matter = energy

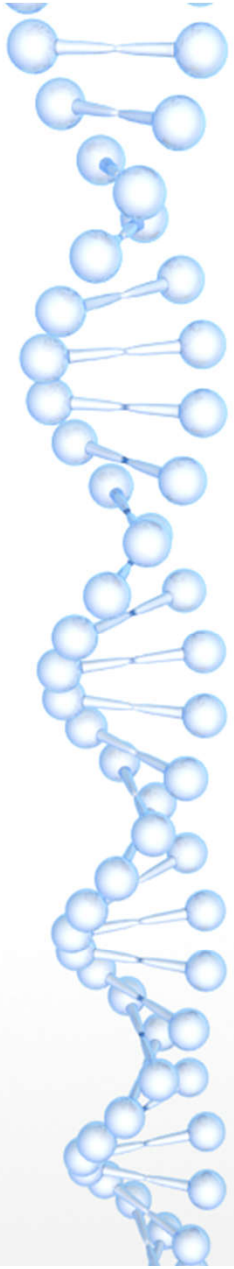

Experimental healing

- Way to overcoming of symptoms

philosophy
